</tr>
</tbody>
</table>
Meaningful Use (MU) Requirements*

• All Eligible Professionals (EPs) are required to attest to Stage 3 of MU for PY 2021.
• All EPs must have 2015 Edition CEHRT implemented.
• 8 objectives and their related measures must be met.
  o 5 objectives are percentage-based measures
  o 3 objectives are yes/no measures
• If exclusions are selected, must meet exclusion criteria.
• Must report on minimum required number and type of eCQMs.
• Must maintain at least 80% of all unique patients’ data in CEHRT.
• Must perform at least 50% of all encounters at locations with CEHRT.

*In addition to meeting the MU requirements listed above, the EP must meet all eligibility requirements of the program. To learn about those eligibility requirements use the following link: Documentation Retention.

*Additional documentation may be needed if exclusion is claimed.*
Objective 1: Security Risk Analysis

- **Objective**: Protect electronic protected health information (e-PHI) created or maintained by the CEHRT through the implementation of appropriate technical, administrative, and physical safeguards.

- **Measure**: Conduct or review a SRA in accordance with the requirements under 45 CFR 164.308(a)(1), including addressing the security (including encryption) of data created or maintained by CEHRT in accordance with requirements under 45 CFR 164.312(a)(2)(iv) and 45 CFR 164.306(d)(3), implement security updates as necessary, and correct identified security deficiencies as part of the provider’s risk management process.

- **Exclusion**: None
Objective 2: Electronic Prescribing (eRx)

- **Objective:** Generate and transmit permissible prescriptions electronically.

- **Measure:** More than 60 percent of all permissible prescriptions written by the EP are queried for a drug formulary and transmitted electronically using a CEHRT.
Objective 3: Clinical Decision Support

- **Objective:** Implement clinical decision support (CDS) interventions focused on improving performance on high-priority health conditions.
- An EP must satisfy both measures for this objective through a combination of meeting the thresholds and exclusions.
Objective 4: Computerized Provider Order Entry (CPOE)

• **Objective:** Use CPOE for medication, laboratory, and diagnostic imaging orders directly entered by any licensed healthcare professional, credentialed medical assistant, or a medical staff member credentialed to and performing the equivalent duties of a credentialed medical assistant, who can enter orders into the medical record per state, local, and professional guidelines.
Objective 5: Patient Electronic Access (PEA)

- **Objective:** The EP provides patients (or patient-authorized representative) with timely electronic access to their health information and patient-specific education.

- This objective has two measures.

- An EP must satisfy both measures for this objective through a combination of meeting the thresholds and exclusions for each measure.
Objective 6: Coordination of Care through Patient Engagement

- **Objective:** Use CEHRT to engage with patients or their authorized representatives about the patient’s care.
- An EP must meet the minimum threshold for 2 of the 3 measures or meet 1 of the 2 available exclusions.
- The exclusions for all three measures are the same. If the EP meets one of the exclusions, the EP can meet the exclusion for all three measures.
Objective 7: Health Information Exchange

**Objective:** The EP provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other providers into their electronic health record (EHR) using the functions of a CEHRT.

• An EP must attest to all three measures and meet the minimum threshold for two of the three measures.
Objective 8: Public Health and Clinical Data Registry Reporting

• **Objective:** The eligible professional (EP) is in active engagement with a public health agency (PHA) or clinical data registry (CDR) to submit electronic public health data in a meaningful way using certified electronic health record technology (CEHRT), except where prohibited, and in accordance with applicable law and practice.

• **Measures:** An EP must satisfy 2 of the 5 measures for this objective.
  o If the EP cannot satisfy at least two measures, the EP may still meet the objective if the EP qualifies for exclusions from all measures the EP cannot meet.
# Available Registries in Arizona

<td>CMS-Approved Quality Clinical Data Reporting Registries for 2021</td>
</tr>
</tbody>
</table>

*EPs must be actively engaged to exchange data bi-directionally to meet the measure
**EPs may choose to report on up to 2 registries & count each registry towards the 2 measures required by the objective.
***Available to EPs with below specialties who diagnose and treat >100 cancer cases per year.
[Specialties List includes: dermatologists, gastroenterologists, hematologists, medical oncologists, radiation oncologists, surgeons & urologists.]
What is an Electronic Clinical Quality Measure?

• Electronic clinical quality measures (eCQMs) use data electronically extracted from CEHRT and/or health information technology systems to measure the quality of health care provided. The Centers for Medicare & Medicaid Services (CMS) use eCQMs in a variety of quality reporting and value-based purchasing programs.

• Hospitals, professionals, and clinicians use eCQMs to provide feedback on their care systems and to help them identify opportunities for clinical quality improvement. eCQMs are also used in reporting to CMS, The Joint Commission, and commercial insurance payers in programs that reimburse providers based on quality reporting.
Definition of eCQM for PI Program

• EPs must attest to 6 out of 47 available eCQMs.
  o 6 outcome measures
  o 27 high priority measures
  o 14 remaining measures

• **Priority Level 1:** If relevant, at least one eCQM should be an outcome measure.
  o **Priority Level 2:** If no outcome measure is relevant, at least one eCQM should be a high priority measure.
    • **Priority Level 3:** If no outcome or high priority measures are relevant, report on relevant measures if possible.
General Polling Questions
Has 2015 certified electronic health record technology (CEHRT) been fully implemented at the practice?

Yes
No
Unsure
N/A
When do attestations for Program Year 2020 and Program Year 2021 close?

- July 31, 2021
- October 31, 2021
- December 31, 2021
- January 14, 2022
- Unsure
<p>| | |</p>

Polling Questions for Objective 7 – Health Information Exchange
What is the Health Information Exchange (HIE)?

Health Current is the HIE that helps partners transform care by bringing together communities and information across Arizona.

The HIE provides secure access to patient health information as well as the secure exchange of patient health information between the HIE and its participating organizations and providers.

The HIE helps facilitate coordinated patient care, reduce duplicative treatments, and avoid costly mistakes. This practice is growing among health providers because the need for HIE is clear and the HIE benefits are significant.

All of the above
What are the benefits of the Health Information Exchange (HIE)?

To better track and securely share patients’ complete medical histories, more and more healthcare providers are participating in HIE.

HIE helps facilitate coordinated patient care, reduce duplicative treatments, and avoid costly mistakes.

Using the HIE is growing among health providers because the need for HIE is clear and the HIE benefits are significant.

All of the above
Are you participating in the Health Information Exchange with Health Current?

- Yes
- No
- Unsure
- N/A
Would you like to be contacted by Health Current for assistance with the HIE?

- Yes
- No
- Unsure
- N/A
What are ADTs?

ADT’s are Notifications of Admissions, Discharges and Transfers (ADTs) that may contain immunizations, medications, problem lists, treatments/procedures, and other documents via Secure Email and Direct Notifications.

ADT Alerts are notifications that facilitate communication and transition of care between hospital and care teams allowing notifications with in-network and out-of-network providers from a centralized, secure system.

ADT Alerts are never sent when a patient is admitted to a hospital, transferred to another facility, or discharged from the hospital.

ADT Alerts can assist in preventing re-admissions as clinical events are transferred to hospital staff, case managers and providers, etc.

Unsure
What is a CCD-A?

The CCD-A is the continuity of care document architecture.

The CCD-A essentially the standards that define the presentation of that same information normally presented CCD document in electronic format as defined by HL7.org.

The CCD-A is different from a CCD as the CCD is a continuity of care document where the CCD-A is the continuity of care document architecture.

All of the above

Unsure
For the Health Information Exchange objective (objective 7), how many measures must an EP meet to meet the objective?

- 1 Measure
- 2 Measures
- All 3 Measures
- Unsure
Which measures is the EP using to meet the Health Information Exchange objective? (select all that apply)

Measure 1: EP transitions or refers patients

Measure 2: EP receives patient transitions or referrals

Measure 3: EP receives patient transitions or referrals and performs a clinical information reconciliation
Does the EP meet the Health Information Exchange objective (objective 7) if the EP meets measure 1, an exclusion for measure 2, and does not meet the measure or the exclusion for measure 3?
When must the transition of care or referral occur for it to be included in objective 7, measure 1?
